1 TICKLED PINK

Bottega Veneta adds a dash of sugar and spice to its acetate and metal cat-eye shades with a pink-on-pink effect that's more Bratz than Barbie. Fitted with nylon lenses that have a higher optical quality than polycarbonate ones, this model offers character *and* clarity. \$565, bottegaveneta.com

2 BLUE CRUSH

These Dolce & Gabbana Eyewear sunglasses look custom-made for the beach: The glitter mimics shimmering waves, the gold-toned sides recall the sun, and the azure-tinted lenses conjure the ocean. \$200, farfetch.com

3 MELLOW YELLOW

Research shows that yellow lenses can help filter out harmful blue light. Gucci offers that benefit alongside beauty with this oversize mask design, which gets even more pizzazz from a gold-toned metal frame and the atelier's interlocking logo. \$580, gucci.com

4 GO GREEN

French brand Jacquemus celebrates the lushness of summer with lenses that transform from a warm pistachio to a fresh spearmint, grounded by a translucent acetate frame. \$460, mytheresa.com

5 TANGERINE DREAM

Make a statement in Rick Owens' cosmically large shield-frame sunnies. The dramatic orange and mirrored lenses emit a supernova glow, guaranteeing that all eyes will be on you. \$825, farfetch.com
